Master's degree in Ingegneria Informativa

Xianwen Jin

Software Engineer
Padua, Veneto, Italy

Summary

Skilled, well-organized and passionate developer graduated with a Master's Degree in Computer Engineering.

I have been working at Intesa Sanpaolo as software developer and involved in developing applications based on microservice using Spring Framework.

I also have working experience on Big Data frameworks such as Flink, Spark and MapReduce. Furthermore I am attracted by different technology fields such as Algorithms, Mathematical Programming and Computer Vision.

Summary

- Main Programming Language: Java and Python
- Experience with development of Streaming application involving CDC, Kafka, Flink Framework and Database management in java (PostgreSQL, MySQL, Oracle DB)
- Experience with development of MicroServices application using SpringBoot
- Experience with development and project management tools (IntelliJ IDEA, Maven, Git, Jenkins, Ververica, Kibana, Oracle SQL Developer)
- Knowledge of front-end web standards (HTML, CSS, JS)

Experience

Intesa Sanpaolo
Software Engineer
November 2023 - Present (2 years 7 months)
Turin, Piedmont, Italy

The main focus is on:

- Reengineering of the pipeline that processes the customer's personal data.
- The transition was made from a NiFi + Flink pipeline to a fully Flink-based solution.

- Performance study on a microservice in terms of CPU, memory, thread, and connection pool based on JFR in order to improve the TPS.
- Development and analysis of the spring boot microservices according to new functional requirements

Huawei

Software Engineer

March 2023 - August 2023 (6 months)

Dongguan, Guangdong, China

Software developer and mainly responsible of collecting CodeArts pipeline statistics. The CodeArts Pipeline is essentially a visual automated task scheduling platform, which needs to be used in conjunction with the automated tasks of compilation and build, code check, cloud testing, deployment and other services in the software development cycle.

Technology Reply

Technical Consultant

January 2021 - December 2022 (2 years)

Padua, Veneto, Italy

- Design and implementation of offloading pipeline made of change data capture tool

from mainframe, event streaming platform (Kafka + Apache Flink) and relational

database for a main Italian banking group to address PSD2 regulation and open bank-

ing challenge

- Support the client for Application Maintenance
- Contact the vendor support for issue reporting/debugging

Adaptica S.r.l.

Assembly Specialist

December 2017 - June 2018 (7 months)

Padua, Veneto, Italy

Education

Università degli Studi di Padova

Bachelor's degree, Electronic Engineering · (2014 - 2017)

Università degli Studi di Padova

Master's degree, Computer Engineering · (October 2018 - December 2020)
